EDUCATION

B.S. in Computer Science, University Honors Program *Expected May 2029*
Northeastern University *Boston, MA*
GPA: 3.990 | Dean's List
Coursework: Algorithms and Data, Foundations of Cybersecurity, Intro to Databases, Discrete Structures, Program Design and Implementation, Intro to Mathematical Reasoning
Certifications: Google Cybersecurity Specialization (Sep. 2024) | AWS Cloud Practitioner CLF-C02 (In Progress)

SKILLS

Languages: Python, JavaScript, TypeScript, HTML, CSS, SQL
Frameworks: React, Next.js, Node.js, Tailwind CSS, pandas, Matplotlib, PyMuPDF
Tools: PostgreSQL, Supabase, Git, Stripe Connect, Puppeteer, Vercel, WordPress, ffmpeg, AWS

EXPERIENCE

Software Engineer, Payments & Internal Tools *May 2026 – Present*
Rainfall Learning *Remote*
- Developed a **Stripe Connect** integration to onboard tutors as connected accounts, automate split payouts after each session, and manage recurring subscription billing for the platform
- Build internal dashboards providing real-time visibility into tutor payout status, transaction reconciliation, and failed transfer resolution, reducing manual payment operations

Data Visualization Lead *Sep 2025 – Present*
Northeastern Electric Racing *Boston, MA*
- Promoted to lead after one semester; develop a **Python** GUI that gives engineers direct telemetry access, replacing manual database queries with instant cross-session comparisons
- Engineer an automated post-race visualization pipeline with **Python**, **Pandas**, and **Matplotlib**, cutting data processing time by **~40%** and accelerating setup decisions between runs
- Architect a pip-installable library to standardize telemetry processing across **4 subteams**, eliminating redundant code and enforcing consistent data handling across the car

Teaching Assistant — CS 2100 *Jan 2026 – Present*
Northeastern University, Khoury College of Computer Sciences *Boston, MA*
- Lead weekly lab sessions and **5 hours** of office hours for **200+ students**, guiding them through Python debugging, data structures, recursion, Pandas, and graph algorithms
- Evaluate homework and codewalk submissions across **8 assignments**, delivering comprehensive feedback on code, structure test coverage, and design decisions

Sales Intern *Aug 2024*
Banke International Properties *Abu Dhabi, UAE*
- Generated **20+ qualified client leads** through cold outreach, property viewings, and direct prospecting; prepared comparative market analyses and proposals for high-net-worth clients

PROJECTS

A-Level Past Paper Question Generator ***| Python, Supabase, PyMuPDF*** *Jan 2026 – Present*
- Build a Python scraper that extracts questions and diagrams from A-Level past papers, populating a searchable database of **500+** practice questions organized by subject and difficulty
- Implement LLM-powered question generation using vector similarity search and few-shot prompting to produce unlimited new practice questions matching official exam style

ImpactTrail ***| Next.js, TypeScript, Supabase, Gemini API*** *Feb 2026 – Present*
Winner — Best Overall, HackBeanpot 2026
- Design the **Supabase** backend schema and integrate **Gemini API** to auto-summarize volunteer quest details, optimizing storage to operate within free-tier database constraints
- Build a gamification platform featuring daily quests, leaderboards, and a points reward system to incentivize community volunteer work; continuing development as a production mobile app

NU Rate-on ***| React, Tailwind CSS, Puppeteer, Supabase*** *Sep – Nov 2025*
- Developed a responsive **React** interface with filtering and search, enabling students to compare menu items across two dining halls and make informed meal decisions
- Automated real-time menu data collection with a **Puppeteer** web scraper, eliminating manual data entry and ensuring up-to-date dining information synced to the Supabase database
